Deliver a Product to Market

	REVIEW	HISTORY
Meets	Specifications	
	Anthony 🕖	
-	ations 🎉 🎉 done it. Your hard work has finally paid off and you hav	ve completed this project 👍
	-	so I will really encourage you to keep learning and exploiting new added some resources so you can check it out and learn more.
Please no	te that it's always important to work closely with the	rubric. Because it's the rubric is use to correct your work
l wish you	ı all the very best out there!!! 🌋	
Best regar Your revie		
Define	e Product and Market	
~	PRD is well-organized and includes:	
	 Background information about the industry 	or the problem
	 Problem Statement 	
	Product Goals	
	 Key Features of your project 	
	Success Metrics	
	Target Market	
~	Market size is estimated based on publicly availab	le data
	Size calculation uses reasonable assumptions and	is logical
	Data sources and assumptions are documented	
	Good	
	Total Addressable Market	
	therefore the market size varies. Furthermore, app within one academic to figure out what job would only look at the market size on an annua • Number of students enrolling to college	
	 LinkedIn Premium subscription: \$29.99 TAM: \$600.7 Million 	
	figures. A degree of confidence was gain the same figure.	e were projected using historical enrollment and since 2 separate sources had approximately to the current LinkedIn premium rate of \$29.99
	¹ Hanson, Melanie. "College Enrollment & Studen 26, 2022, https://educationdata.org/college-enroll	t Demographic Statistics" EducationData.org, July

² "College enrollment in the United States from 1965 to 2020 and projections up to 2030 for public and private colleges" Statista, 2022,

You have done a good job identifying at least two competitors (Monster job , indeed) for your product	You have do	ne a good job identifying at least two competitors (Monster job , indeed) for your product	

Marketing and Pricing Strategy

At least three channels are identified in the PRD At least two are not AppStore channels. \checkmark

Each channel has:

- A description of the channel
- An explanation of why this channel was chosen

A Marketing Guide is linked in the PRD. \checkmark

The Marketing guide includes:

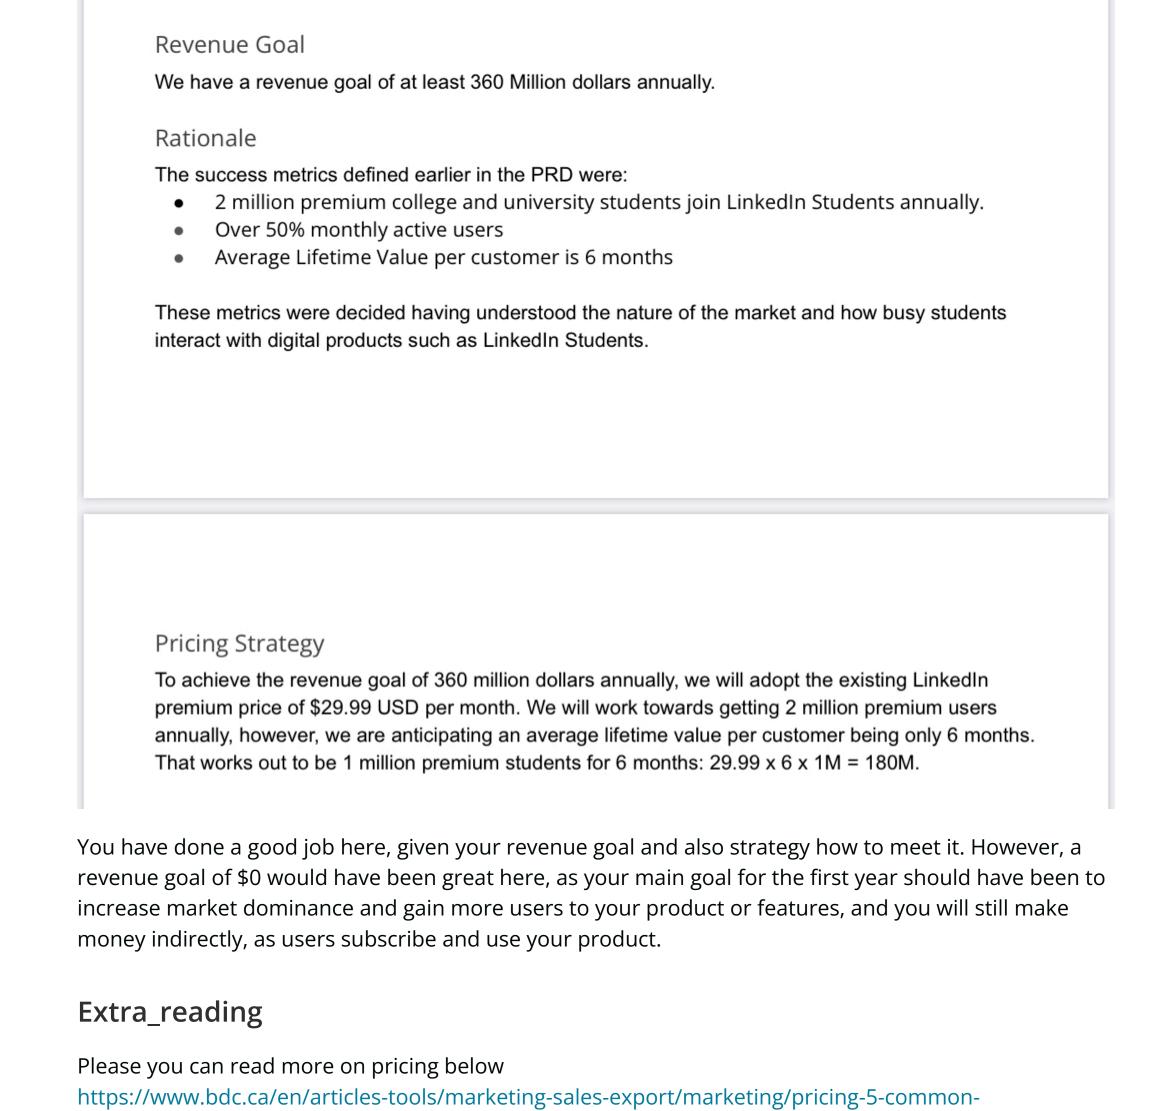

- Key features of the product
- Benefits to users and consumers
- How to use the product
- Where users can find the product

A Pricing section is added to the PRD including: \checkmark

- The revenue goal
- An explanation of why this goal was set
- A pricing strategy to meet the revenue goal

Good

Pricing

strategieshttps://business.gov.au/products-and-services/develop-a-pricing-strategy

Preparing for Launch

The checklist is included in the PRD and includes all of the teams that you will need to interface with \checkmark before launch

Each team has at least one discussion item specified

Good

Preparing for Launch

Pre-Launch Checklist

- Leading up to the launch, I would need to have a chat with:
 - Marketing to finalize the marketing plan and marketing materials
 - Sales to educate them on the features and benefits to sell
 - Customer Service to understand potential issues and limitations of the product and how to
 - resolve or work around them Engineering - to have someone or a team on standby to fix any launch day issues or bugs

You have clearly included discussions with all the necessary teams (Marketing, Engineering, legal, customer support and sales etc) you need to interface with before the launch of your product. This is very important as each team will be clearly aware of what needs to be done and steps to take to ensure quality and successful product launch.

At least three risk factors are identified in the PRD \checkmark

A mitigation plan is included for each risk factor

Good

Risks

Some risk factors we may experience are:

- Viral usage of the product and increased server requests. To mitigate this risk of overloading our servers, we have opted to use Amazon AWS with an elastic cloud deployment. This means, as demand increases, the service will make more servers available to meet those demands.
- Zero-day/ launch day bugs discovered. To mitigate this, we have arranged with members of the engineering team to be on hand to resolve these issues as they arise.
- Increased demands on customer service. This is a new product and we are sure students will have a lot of questions about the accuracy of our matches and how to properly use the product. We have arranged with Marketing to produce guide YouTube videos and help articles that walk them through using the app. These videos and articles will be available in a help

You have clearly identified at least 3 risk factors for your product (Linkedin for students) and given a mitigation plan. This is great because by identifying what will affect your product launch, gives you the ability to limit down-sides and down-falls for your product those putting it leveled and above competitors. Extra_reading

Please check out the source below to get more ideas on how to detect and mitigate risk for your product. Five ways to mitigate product risk

section of the app.

A training guide for the Sales and Customer Support Teams is linked in the PRD and includes: \checkmark

- Key features of the product
- Benefits to users and consumers
- How to use the product
- Where users can find the product

User guide for users/customers is linked in the PRD and describes at least two of the product's key \checkmark features and explains:

- How to access each feature
- How to use each feature

Post Launch Activities

The proposed solution and the test are included in the PRD \checkmark

The test includes:

- A description of the proposed solution and an explanation of why it solves the problem
- Success metric for the test
- A description of the control and variant
- A hypothesis about what will happen

Good

The user feedbacks analyzed and then a proposed solution determine, with a hypothesis put in place, control and variant and how success will be measure, which is very important because, it's also determined by certain factors which can be quantified, you can know that you have solved the issue. Handling, user feedbacks like this after the first launch of your product is a great way to meet customers' satisfaction for your product. It also help to retain more users, bring more users and keeps you above your competitors.

A link to the email is included in the PRD. \checkmark

The email includes:

- Background information about why the product was developed
- A description of the product and its key features
- Visual representations of launch data
- Next steps
